

e-Portfolio | e-track

e-track is an electronic portfolio system designed to replace traditional paper-based methods of assessment, allowing for a more flexible and efficient learning experience.

The system enables users to securely manage assignments, and gather, store and track workplace evidence during their apprenticeship programmes.

e-track provides a learning environment based on the apprentice's need where they can have real time access to support and resources through an easy-to use web interface and mobile apps. Apprentices can:

- Review their own progress
- Receive feedback and messages from their skills coach
- Upload and submit their own evidence
- Map and score evidence to the qualification or apprenticeship standard
- Send messages and leave comments on work uploaded for review by the skills coach

Using e-track can have a positive impact on learning and skills development including:

INCREASES ENGAGEMENT – learners and skills coaches can access work anytime and from anywhere

IMPROVES OUTCOMES – brings together apprentices and skills coaches in order to move learning forwards

DEVELOPS INDEPENDENT LEARNING SKILLS – encourages apprentices to take ownership of their own learning

REDUCES COSTS – removes the need of costly and time consuming administrative tasks
