

## Virtual Learning Services

Business disruptions can impact organisations of any size and industry, in any location. Right now, the COVID-19 pandemic has changed how we are all operating and interacting with each other. Maintaining business continuity is more important now than ever to ensure we are prepared for a new business 'normality' and emerge from this difficult period in a stronger position.

To help you adapt to new ways of working and maintain business continuity and stability, GP Strategies has created a range of free tools and resources to support you through the crisis and beyond.

- **Free** access to a range of online leadership and management training resources to help manage your teams through uncertain times.
- **Free** access to podcasts, webinars, and online resources to assist with the impact of COVID-19 and support ongoing workplace activity.
- **Free** remote apprenticeship enrolment and delivery service with 24/7 access to our latest online learning content via our learning hub.

- **Free** support, information and advice on how to maintain employee and apprentice motivation while remote working during lockdown or furlough situations.
- **Free** employer consultation to understand the challenges your organisation is facing, including a no obligation 'training needs analysis' which provides a summary of funded training opportunities available to you and your employees.
- **Free** end to end remote apprenticeship recruitment service, to support your current and future recruitment needs.
- **Free** dedicated recruitment consultant to guide you through the entire process.
- **Free** online employee information sessions to raise awareness of training opportunities with advice on how apprenticeships can provide vital skills, knowledge and behaviours (supporting both new and existing staff).

We understand that the current situation presents new challenges to everyone, which is why we have migrated to a remote delivery model and created a range of resources to support you and your employees, and to provide maximum flexibility as the situation continues to evolve.
